

Our Process

Our puppies do not touch grass until after 8 weeks old to help prevent contacting the parvo virus. Our puppy whelping area and play areas are sanitized three times a day, and we rotate the types of sanitizers we use. We interview potential puppy owners to make sure the puppy and new owners are a good fit. Our vet gives each puppy a health certificate and offers a coupon for their next set of shots (\$59.00 value). We require a puppy contract and deposit to hold your puppy. Puppies will be picked out at 6 weeks old. We will provide weekly virtual puppy visits to those who put down a deposit. Don't want to put a deposit down? No problem, it seems like lots of people are getting scammed these days. We do provide several references – please see our reference section. No deposit means if there are puppies not spoken for at the end of 8 weeks these puppies will be available for you to take home! [Link to puppy contract and spay neuter contract.](#) We hold your deposit until you pick up your puppy. Deposits are not refundable. If for some reason you can't get a puppy from the litter you deposited on, we will hold your deposit for another litter. We also require a spay/neuter contract with notification to us when this has occurred. We do not provide puppies for breeding purposes, unless prior arrangements have been made. Puppies come home with all appropriate shots for their age, have been de-wormed, dew claws removed, health records, microchipped and a vet health guarantee. We provide a genetic guarantee for 12 months. We also provide personal delivery to bring your puppy to its forever home (additional cost will apply). We do not ship puppies in cargo, they ride with us on a plane or in a vehicle to their destination.
